
JetCity

Offering an impeccably maintained Citation X and other jets to corporate clients

For over 20 years, JetCity has been at the forefront of servicing the needs of Australian private jet users.

As a company founded and staffed by corporate pilots, we understand the sophisticated requirements of the modern business executive.

Our main base is located at Essendon airport which is situated less than 10km from the Melbourne CBD providing domestic and international charter.

Our fleet comprises a 9-10 seater Citation X, 10 seater Gulfstream IV and two 8 seater Learjet 45's covering the entire light to heavy jet market and servicing all of our client's needs. In addition to these aircraft we also manage other jet types for our existing clients.

We have an impeccable safety record both on the ground and in the air. Our operation is regularly audited ensuring we meet the highest industry standards.

JetCity Engineering has full in-house capabilities to provide line and heavy maintenance services for airframe, engine and avionics services with the added ability to assist in remote locations if required.

We provide a 24/7 Fixed Base Operation (FBO) to ensure your flight is completely hassle free. When you arrive at our premises, there is no queuing for check-in or immigration, no waiting for delayed aircraft just the opportunity to relax and enjoy the experience, all within the comfort of our private executive lounge.

Our driving motivation is to provide attentive service at all times. We will go the extra mile to ensure your total satisfaction, no matter how big or small. It goes without saying the comfort and amenity in our jets and facilities are of the highest order. We operate a highly responsive customer service model – we never close and are always contactable in person.

JetCity welcomes your enquiries about our private jet charter, FBO services, aircraft management and maintenance services. Contact us any time of the day or night, we are always available to service our clients' needs.
