Safety and Quality in Private & Business Aviation

Swan Aviation (Kugu Havacılık ve Turizm A.S.) was founded by two aviation experts on 2nd April 2007, it then acquired its AOC (Aircraft Operation Certificate) on 6th March 2008.

Since that time the Swan Aviation fleet has continued to expand to ever greater aircraft numbers.

Swan Aviation ensured its high quality and safe service perspective by acquiring TSE-ISO-EN 9000 Quality Certificate on July 8th 2008 and is continuing with ISO 9001:2015.

Being aware that safety and quality are the two major principles of aviation, Swan Aviation has ensured that all employees embrace this understanding in all our practises.

Swan Aviation offers the experience of private flight with luxury, punctuality and reliability, without compromising comfort and flight safety.

Swan Aviation provides full support for all processes from purchasing to technical acceptance, this includes bringing aircraft to it's base, making necessary arrangements for customs clearance, registration and complying with all national and international regulations.

Swan Aviation deals with everything from contracting crew, dealing with insurance to routine flight services, leaving the owner to deal with just the smooth feeling of flying!
