
Gestair

Simplify. Simply, Fly.

Gestair is a Spanish company and leader in that country, which has already become a European benchmark in business aviation, with more than 40 years of experience in the sector.

With a fleet of 35 aircraft, it is an expert in aircraft management and maintenance. The company has three distinct business areas.

Gestair Aviation: with AOC in Spain and AOC in Malta, it is the unit specializing in business aviation. Among its areas of reference are the integral management of aircraft, customized flights, chartering flights, technical and operational support and any sales/purchase advise that clients may require.

Gestair MRO: this unit specializes in aeronautical maintenance and has the largest Aeronautical Maintenance Center in Southern Europe. It has 2 hangars at Madrid-Barajas airport and an available surface area of more than 23,000 sqm with the capacity to house from a Very Light Jet to an Airbus 330.

Gestair Aeroplanning: is the unit specialized in coordination and flight planning. Its team of professionals offers solutions to all operational and technical flight requirements for private and commercial aircraft.

The company is firmly committed to climate change and environmental action therefore developed and launched HORIZON, the program through which Gestair offsets the emissions of all its flights.
